SINGLE Pocket Door

More useable living space in your home

Why choose a Pocket Door?

Here's a question....are there advantages in using a hinged door over a pocket door?

They take up more space and make the space 'behind the door' unusable

Pocket doors open up that space, room for an armchair, chest of drawers, washing machine and so many more ideas.

Why Not?

If every door in a living space was a pocket door you would have almost 10% more usable living space, so the question was "Why use a pocket door", well it just makes good sense. Living room, dining room, utility, en-suite...the list goes on.

Make the most of your living space, choose a pocket door!

Why choose a Rocket Pocket Door?

Lifetime Guarantee 100% Steel

100% Steel pockets do not warp like timber pockets but have been expensive to produce until now. Our full steel system is galvanised to EN10346 standards with a 10 zinc coating ensuring a long, rust-free life. Quality runners are tested to more the 100,000 open and close cycles.

Product Knowledge

With more than 30 years experience in the pocket door market we have the right answers to all your questions. From initial project to installation advice we are ready to help you make the right decision.

At Your Service

We really are 'at your service' with technically trained personnel who want you to have the very best experience with us. We offer a next working day service for orders placed before 1.30pm on a weekday.

Value for Money

We have designed and installed innovative production machinery with the very latest technology that allows us to bring you a quality steel pocket door system at costs that are accessible to all.

Quickest and Easiest to Fit

The quickest and easiest fitted pocket door frame on the market. Click the horizontals to the verticals and then, with just 6 screws, the pocket is formed.

Quick, simple and no hassle.

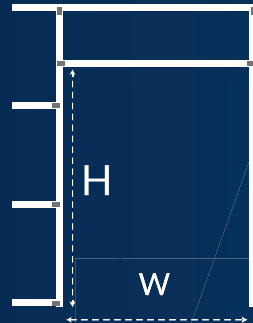

Choosing the right pocket door

1 Sizing

page 8,9 and 10

What is your priority?
Door panel size? Overall Frame Dimensions? Passage Width? Pages 8, 9 and 10 will show you how to choose BUT first check out page 7 and select the size of studwork you will be using.

2 Studwork

page 7

Your installation will be simpler if the pocket thickness is similar to your studwork thickness, go to page 7 to find out how.

3 “Do I need a jamb kit?”

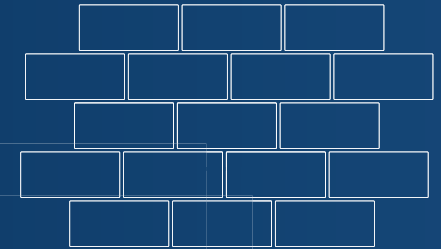

page 14

Jamb kits are timber lining kits that frame the door after installation and cover the top of the door/runners and metal pocket entrance verticals. Check them out on page 14.

4 “I’ve got a solid wall”

page 13

You can still use a Rocket pocket system, go to page 13 to find out how.

5 Want a frameless glass pocket door?

page 12

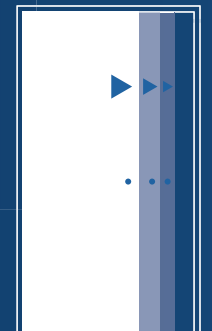

We offer a selection of frameless glass doors that slide effortlessly into the Rocket Pocket frame ideal for en-suites, utilities and wherever you need more light, see page 12.

6 Looking for a modern soft closing effect?

page 15

A soft closing device is part of our range of accessories, page 15.

Timber
or Steel Stud

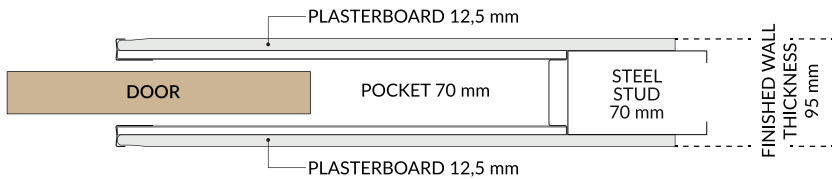

There are so many studwork sizes around so matching the pocket thickness to the studwork thickness becomes very important.

We manufacture Rocket pocket frames in 3 different thicknesses to make life easier when installing 70 mm 75 mm and 90 mm and these can be arranged to suit the majority of common studwork sizes. Check out the table opposite to choose the right pocket thickness for your stud.

1 + 1 = 2

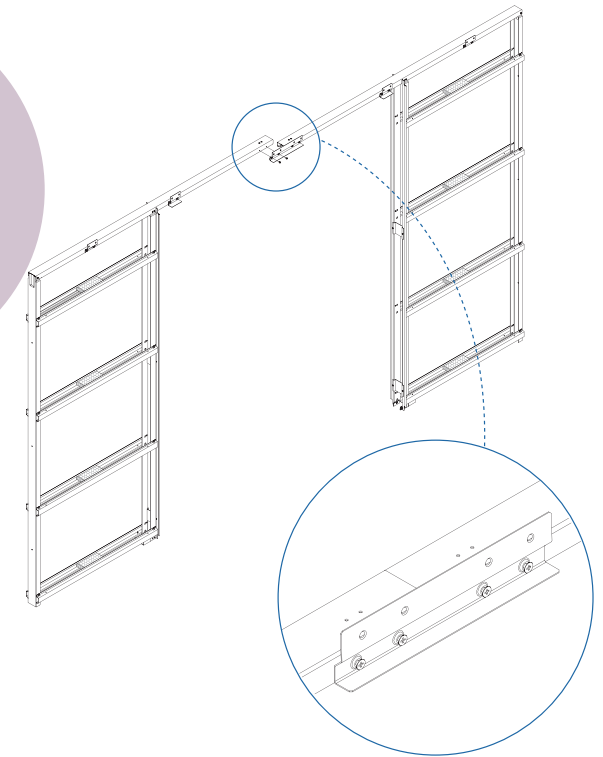

It's so simple, so easy and so quick!

Every single kit comes supplied with an innovative joining bracket that allows you to join two singles to make a double.

No hassle, No extra joining kit (you save money!), it's just plain common sense.

Intimate to Open Plan

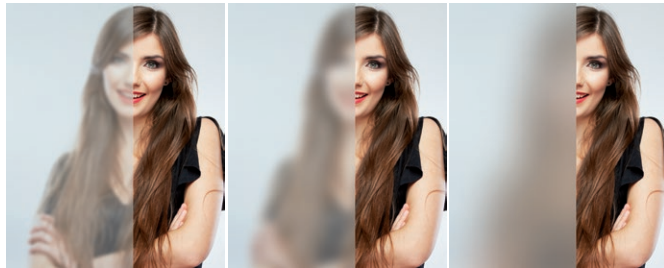

Double Pocket Door

Dimensions

Because they are essentially two single systems connected together the overall dimensions are the same height and double the width of a single unit.

Frameless Glass Pocket Door

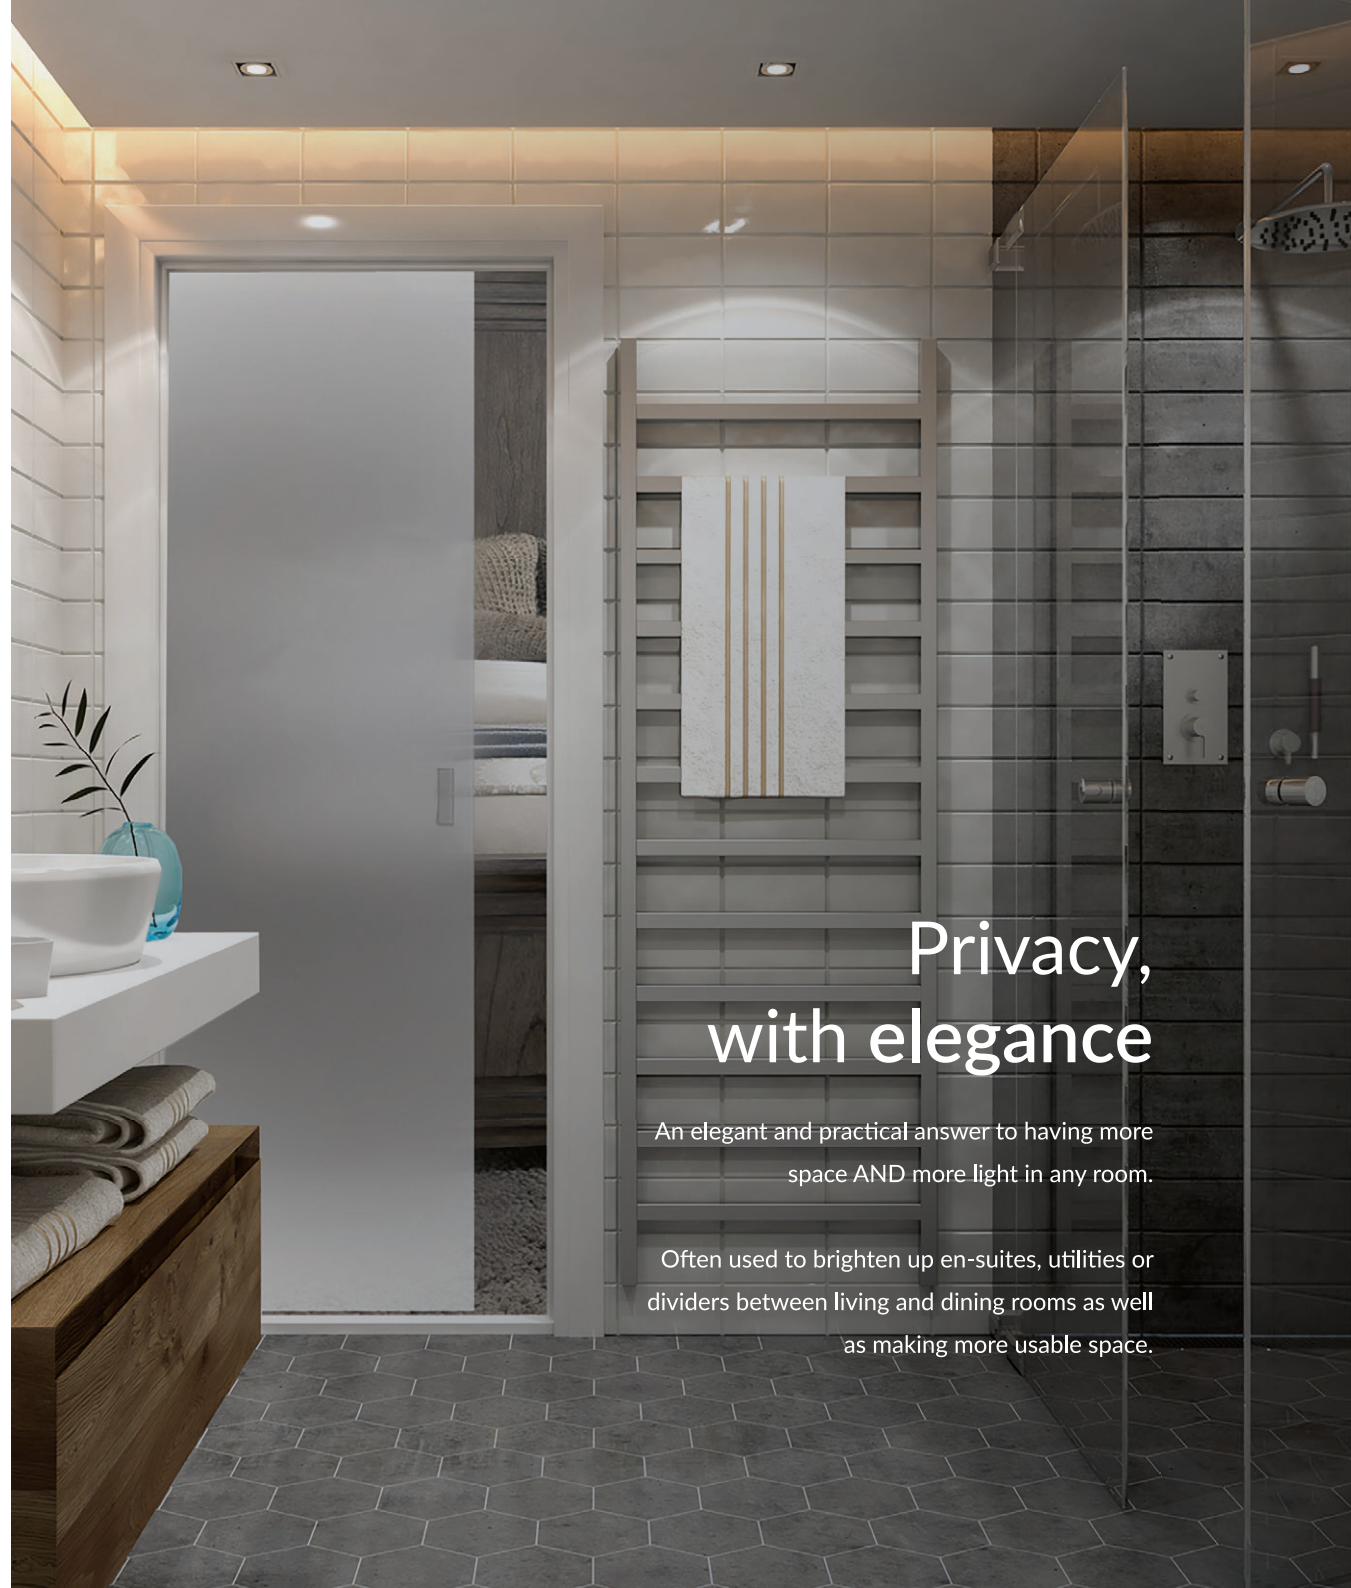

At 10cm

At 30cm

At 100cm

Our Glass

We only use glass manufactured in Europe to European safety standards. All our glass doors are safety tempered to EN12150. We supply satin glass which is an opaque finish generally regarded perfect for en-suites.

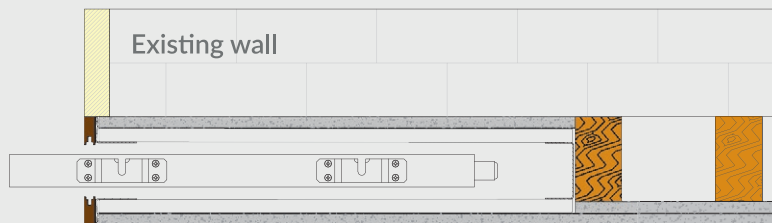

Privacy, with elegance

An elegant and practical answer to having more space AND more light in any room.

Often used to brighten up en-suites, utilities or dividers between living and dining rooms as well as making more usable space.

Got a solid wall? No problem

Just create a false wall along side the existing one. You can still use a Rocket Pocket door even if you have an existing solid wall. A quick and easy solution with no need for knocking out bricks or lintels etc.

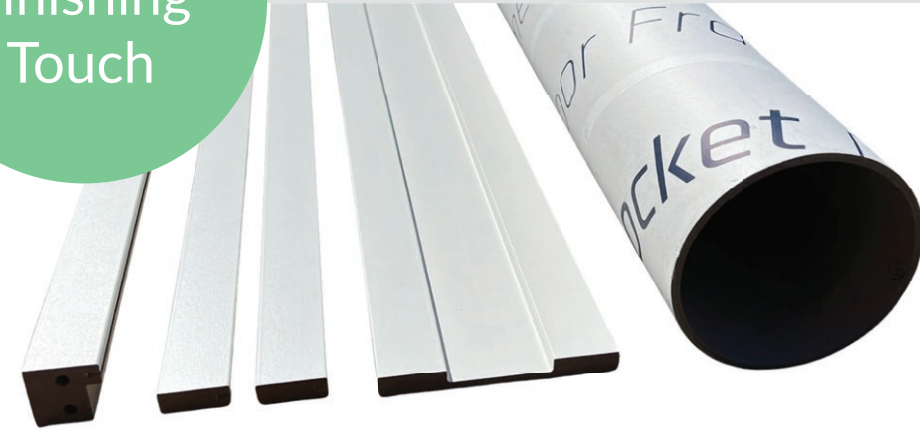

-  89 mm CLS
-  12,5 mm Plasterboard
-  Jamb Kit
-  Timber Liner (Not Supplied)

The
Finishing
Touch

The “Jamb” Kit

What are they ?

The jamb kit is essentially a timber lining kit fitted after the door to cover the top of the door, runner etc and line the metal entrance verticals to the pocket to give a clean professional finish.

Do I need one?

We can provide a simple jamb kit as an accessory; it is manufactured from MDF and can be painted to the colour you desire.

Alternatively you can provide your own if you wish to have a specific type of wood/finish.

Accessories

1. Soft Closer

A quick fit soft close system that dampens the door when closing, stops it from banging and gently closes the door for you. You do need to push the door first, it's a similar action to kitchen drawer soft closers. We have a system for doors up to 35kg which are most modern doors and a system for doors from 35 to 45 kg.

2. Glass Door Soft Closer

This is a soft closer designed specifically for Rocket Pocket Frameless glass doors.

3. Self Closer

This differs from the soft closer, you just open the door, pass through and the self closer closes it for you. Timber doors only.

4. Door Furniture

Round or Square Flush pulls and bathroom locks in satin chrome make an elegant finish to your pocket door.

5. Jambs

A timber lining kit that covers the metal frame and runners.

6. Push Pull

Ingenious idea for when you want the door to be fully back into the pocket most of the time. Push the door back into the pocket and it remains there. Then with a simple push on the leading edge of the door it pops out of the pocket for you to close.

1.Soft Closer

2.Glass Door Soft Closer

3.Self Closer

4.Door Furniture

5.Jambs
